What to do next?

Give us a call. We will listen. You can reach us by phone on 0316 4682 224 Monday to Friday, 8:00–17:00, or by email at office@lavida.at at any time. Together we will arrange your first consultation, with no obligation.

Applying. The process is simple: you apply for early intervention or family respite online or in person at the Graz city authority (Magistrat), your local municipality or the responsible district authority. We will gladly guide you through this step.

Costs. Early intervention is funded by the Province of Styria from its disability assistance or child and youth welfare budget. For family respite, a personal contribution of 10% applies.

Mobile Early Intervention for Vision

General Early Intervention

Family Respite

ABOUT US

Who are we?

We are a close-knit team of experienced, qualified early intervention specialists with additional training in supporting visually impaired and blind children from birth until they start school, as well as a team of experienced family respite workers who support families in everyday life.

Our work. We support your child in a targeted and holistic way, either in your home or at our early intervention centre. We advise and accompany the whole family and work closely with other specialist disciplines.

"Reaching goals always means walking the path together"

OUR SERVICES

Early Intervention

Mobile Early Intervention for Vision

We support children with visual impairment or blindness, with a special focus on visual perception, remaining vision, and mobility and orientation.

General Early Intervention

We support children with developmental delays, disabilities or developmental risks in all areas of development.

For your child. In both services, we support your child holistically across all areas of perception, strengthen their independence and gently prepare them for kindergarten and school.

For the family. We advise you on special needs education, on designing your child's environment and on setting up play and choosing toys. Through our association you can connect with other parents in a similar situation, and we accompany and support you in your particular circumstances.

OUR SERVICES

Family Respite (FED)

What is it? FED is a support service under the Styrian Disability Act for people with disabilities who live with their families.

For you. We accompany, support and care for you by the hour or by the day, so that your family can catch its breath again in everyday life.

Our goal. A life that is as independent as possible in familiar surroundings, with the people who matter to you.

"We support you and your child"
